1. Four props are available.

2. Props are reconfigurable in height to accommodate the vertical position of the crosshead.

3. Props can be located anywhere on the crosshead, but the preferred location is near the vertical actuators and attached to the crosshead ancillary support system bracket.

4. Each prop incorporates EFCO 9x9 super stud, adapter brackets and plates, high capacity rod-end style swivel bearings, and a 100-kip model RGH Sensotec load cell.
